Zbyněk Dohnálek

INFORMATION TECHNOLOGY STUDENT

Brno, Czech Republic | zbynekdohnalek036@gmail.com

Portfolio: gr3i.github.io GitHub: github.com/gr3i

PROFILE

I study Information Technology at Brno University of Technology (BUT). I work on automation, system integrations and running my own projects. My interests include software development and IT security.

PROJECTS AND EXPERIENCE

FBM Discord | Founder and Technical Administrator 04/2025 – Present

- Founded and continue to develop an unofficial Discord community for students at BUT's Faculty of Business and Management (over 1,600 members).
- Develop and maintain BizzyBot, which uses the BUT API to verify members and automatically assign roles based on faculty, degree programme and year of study.
- Automated the creation of more than 200 course-specific channels and expanded BizzyBot with community management features such as onboarding, classroom lookup and faculty news monitoring.
- Initiated cooperation with the faculty and helped present the project to its leadership. The server was later included in the first-year student guide as an unofficial communication channel.

Personal Scripts, Automation and IoT Selected projects

- Automated time-consuming video editing tasks in After Effects, including time remapping, using scripts and keyboard shortcuts.
- Experimented with Arduino, TinyPICO and Raspberry Pi in home IoT projects involving sensors, Bluetooth communication and automation. Also explored practical uses of NFC.
- Created scripts for bulk document downloads and working with data from the AniList API.

DIY Smartwatch | Arduino Nano 2022

Designed, assembled and programmed a smartwatch with an OLED display that communicated via Bluetooth with a companion mobile app built using MIT App Inventor. The app allowed me to control the watch and change its settings. The project also included a custom 3D-printed case.

TECHNOLOGIES

Development: Python (scripts, Discord bot), API integration, Git/GitHub; C++ (practice through Advent of Code).

Infrastructure and hardware: Linux, Docker, SSH, Oracle Cloud, Raspberry Pi, Arduino, TinyPICO.

Graphics and 3D: Adobe Photoshop, After Effects, Blender (basic knowledge).

EDUCATION

Brno University of Technology | FIT 2025 – Present

Bachelor's degree programme in Information Technology (ongoing)

Brno University of Technology | FEEC 2023 – 2025

Information Security (before transferring to FIT)

Gymnázium a SOŠ Mikulov 2015 – 2023

Secondary school leaving examination (Maturita)

LANGUAGES AND OTHER EXPERIENCE

Languages: Czech (native), English (B2, Cambridge English: First – FCE).

Other experience: Led small groups at Scout activities and camps; completed a Scout patrol leader training course; served as a sub-moderator on the BUT FEEC student Discord server.
